---

To whom it may concern,

We have had Printer/Copy/Scan/Fax machines from Complete Business Systems for many years. All have been good machines with excellent service. A few years ago when we upgraded to a new machine, it was asked if we wanted to "network" the new machine. I was in a "no way, don't need it" mindset. I allowed them to do it anyway. It was one of the best business decisions I have ever made. It was one of those situations where you did not know what you were missing until you had it. Once CBS drug me into the 20<sup>th</sup> century with these upgrades, we ordered a new wide format printer/scanner machine (networked of course) for our large drawings. Again, best decision we could have made. We now print directly to the large printer for our drawings and we can even archive our old drawings in a PDF format using this same machine. The service for all our machines is handled professionally and quickly via a web interface or a phone call. I would encourage anyone to let CBS handle your printing, coping, scanning, faxing or document management needs.

Sincerely,

A handwritten signature in cursive script that reads "David Green".
